

Phase 2 – Week 1 – Day 2 Home Assignment

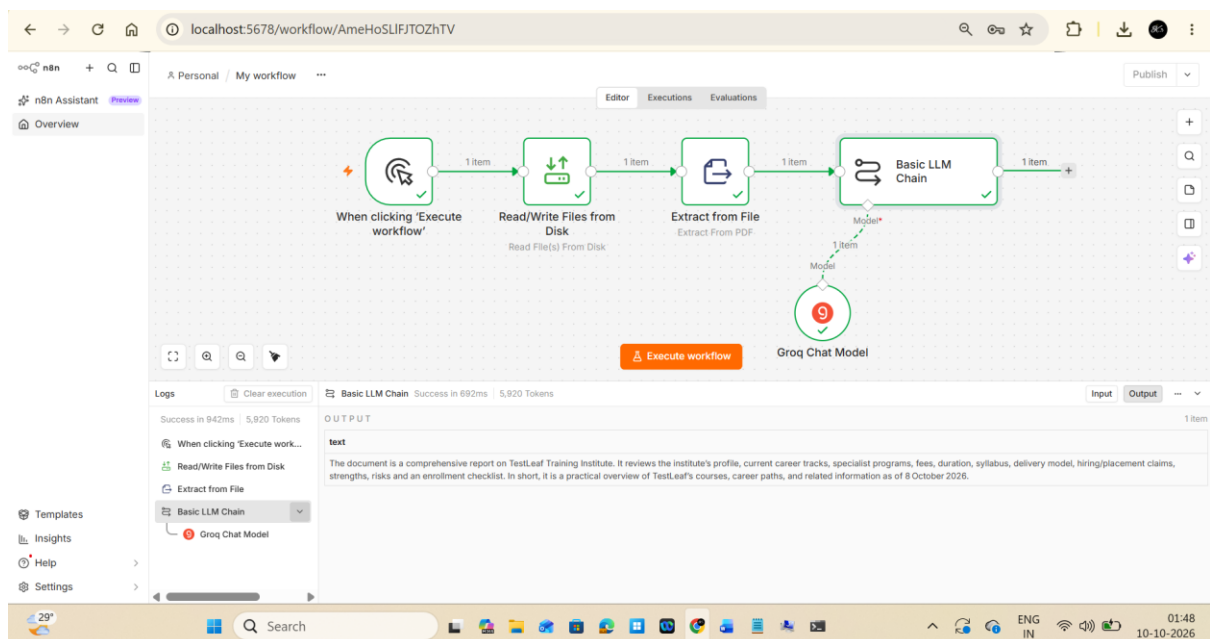

Build a Document Question Answering (Document QA) Agent

Develop an AI-powered Document QA agent that enables users to upload a document from their local system and ask questions based on its content. The agent should extract the document content, understand the user's query, and provide accurate answers using only the uploaded document as the source of information. If the requested information is not available in the document, the agent should respond appropriately instead of generating unsupported answers.

Expected Outcome: Users should be able to upload a document, ask multiple questions, and receive context-aware answers derived only from the uploaded document.

OUTPUT

Text: **Course-level details for TestLeaf's 2026 catalogue (as of the 8 Oct 2026 review)**
[Program | Length | Schedule / Delivery | Listed fee (incl. GST where noted) | Core focus / key topics | Typical outcomes / capstone]
[**Software Testing Foundations** | 8 weeks | Weekend, live-online | Fee not displayed | Testing fundamentals, SQL, API basics, introductory automation, capstone & interview prep | Build a basic testing skill-set and a portfolio ready for entry-level QA roles]
[**Playwright Automation Engineering** | 8 weeks | Weekend **and** weekday options, live-online | **\$40,000** | TypeScript for testers, Playwright framework design (fixtures, config, reporting, reuse), API & contract testing, CI/CD, parallel execution, fake control, AI-assisted test authoring, hands-on labs, capstone, interview prep | Produce production-style Playwright test suites; ready for Automation Engineer roles]
[**Modern SDET Engineering** | 6 months | Weekend, live-online | **\$100,000** | Advanced programming, backend services & contract testing, framework architecture, performance engineering, containers & cloud, parallel grids, production debugging (logs, traces, metrics) | Deliver robust, scalable test frameworks; qualify for Senior SDET positions]
[**AI Quality Engineering** | 4 months | Weekend, live-online | **\$60,000** | GenAI foundations, Prompt & RAG systems, LLM evaluation, Agentic testing, Model Context Protocol (MCP) & tooling, AI security & safety, capstone & interview prep | Build an evaluation harness for an AI feature, assess LLM/RAG/agent outputs, define quality thresholds, prepare for AI Quality Engineer roles]
[**GenAI Essentials for QA Engineer** | 4 weeks | Weekend, online | **\$25,000** + 18% GST (standard) / **\$20,000** + 18% GST (early-bird) | AI-assisted QA fundamentals, two industry projects, portfolio creation, 525 OpenAI API credits, mentorship, GitHub portfolio development | Quick foundation in GenAI testing, ready to move into specialist AI programs]
[**AI Agentic Workflows Workshop** | 3 months | Intermediate level, live-online (weekends) | **\$60,000** + 18% GST (standard) / **\$50,000** + 18% GST (early-bird) | Model fine-tuning (SFT & RLHF), autonomous testing-agent development, production-ready tool building, advanced API integration, \$50 USD OpenAI credits, portfolio showcase & assessment | Build and deploy AI-powered testing agents; demonstrate competence for AI-focused testing roles]
[**Delivery & Teaching Model (common to all specialist programs)** | **Instructor-led live online sessions** (weekends for most programs; some also offer weekday slots).
[**Practitioner-led** - current engineers act as teachers; cohorts are mentor-guided.]
[**Hands-on labs** and **capstone projects** are integral parts of each course.]
[**Interview preparation** is provided (mock interviews, resume/portfolio guidance).
[**Mentor / career-mentor interaction** and **portfolio/GitHub-oriented work** are
